SUMMARY

Enthusiastic Computer Science graduate specializing in Information Security. Builds AI-powered apps and automated workflows with solid full-stack skills, communicating effectively with both technical and business stakeholders.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, MySQL

Frameworks & Tools: Node.js, Flask, Docker, Postman, Git, JMeter, n8n, pgvector, Jira

Concepts: Operating Systems, Data Structures & Algorithms, Computer Networks

Soft Skills: Collaboration, Adaptability, Problem-Solving, Communication

EXPERIENCE

Deloitte

Jun 2024 – Present

AI & Emerging Technologies Intern

Dubai, UAE

Used **JIRA** to manage project tickets, track progress, and collaborate with BA's on business requirements.

Conducted **performance testing** with **JMeter** simulating **1000** concurrent users, improving endpoint response times by **20–30%** and ensuring stability under peak loads.

Built a locally hosted **threat intelligence system** using **n8n** and **pgvector**, integrating **10,000+** MITRE ATT&CK/CVE entries for chatbot-based querying.

Experimented with **Microsoft Copilot Studio** to enable agent-to-agent workflows for real-time security scenario responses.

Intertec Systems

Sep 2023 – Dec 2023

Information Security Intern

Abu Dhabi, UAE

Produced a 68-page risk assessment analyzing **50+** threat events, vulnerabilities, and risk levels for a Windows PC, aligning with **NIST** and **CIS Controls**.

Implemented a **2FA** system (generate, verify, validate) using **Node.js**, **Speakeasy**, and **Postman** for token workflows.

Strengthened skills in security documentation, NIST/CIS, Node.js, HTML/CSS, and API testing.

PROJECTS

Local AI Assistant – Chrome Extension

Feb 2025 – Present

JavaScript, TypeScript, Ollama, AI

Built a privacy-focused extension running local AI models (DeepSeek, Mistral, LLaMA) via **Ollama** to eliminate external API dependence.

Implemented modular background/content scripts and a popup UI for seamless interactions.

Security Issue Management System

Feb 2025 – Present

Flask, SQLAlchemy, Bootstrap

Developed a full-stack web app for tracking and managing security issues with authentication.

Used **Flask-SQLAlchemy** and **Flask-Migrate** for robust database management.

Designed a Bootstrap frontend with Jinja2 templates for a smooth UX.

EDUCATION

Vellore Institute of Technology

Vellore, India

B.Tech in Computer Science (Information Security)

CGPA: 8.49 / 10.0

Abu Dhabi Indian School

Abu Dhabi, UAE

CBSE – Class 12: 86.8%, Class 10: 89.8%

ACHIEVEMENTS

Accepted to present the research paper "A Comparative Analysis of BERT and LLM Models for Advanced Phishing Detection" as an Oral Presentation at IEEE CNC 2025.

CERTIFICATIONS

Oracle Cloud Infrastructure 2024 Generative AI Certified Professional

Python for Beginners: Learn Python Programming (Python 3)

Cyber Security – Python and Web Applications

Google Cybersecurity Professional (ongoing)

AWS Cloud Practitioner (ongoing)
