SUMMARY

Enthusiastic Computer Science graduate specializing in Information Security, with over 1 year of hands-on professional experience in the UAE. Experienced in building AI-powered applications and automated workflows, with solid full-stack capabilities and the ability to bridge technical and business needs. Golden Visa holder.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, MySQL

Frameworks & Tools: Node.js, Flask, Docker, Postman, Git, JMeter, n8n, pgvector, Jira

Concepts: Operating Systems, Data Structures & Algorithms, Computer Networks

Soft Skills: Collaboration, Adaptability, Problem-Solving, Communication

EXPERIENCE

QData - Sirius Holdings(IHC)

Junior Software Engineer Intern

Feb 2025 – Present

Abu Dhabi, UAE

Implemented core components of a real-time **news agent architecture** for market intelligence and financial impact analysis. Designed **PostgreSQL** and **SQLite fallback databases** to ensure resilient storage and retrieval of high-frequency news data. Built and tested **API endpoints** to validate processing pipelines, ensuring reliable data flow and system output integrity. Collaborated in a fast-paced startup environment to debug production issues and ship features rapidly across the backend stack. Engineered asynchronous data ingestion and processing services using **FastAPI** and Python, integrating multiple financial and news data sources.

Deloitte

AI & Web Developer Intern

Jun 2025 – Dec 2025

Abu Dhabi, UAE

Used **JIRA** to manage project tickets, track progress, and collaborate with BA's on business requirements. Conducted **performance testing** with **JMeter** simulating **1000** concurrent users, improving endpoint response times by **23.5%** and ensuring stability under peak loads. Built a locally hosted **threat intelligence system** using **n8n** and **pgvector**, integrating **9,850** MITRE ATT&CK/CVE entries for chatbot-based querying.

PROJECTS

AIAware News Platform

Next.js, React, TypeScript, Firebase, Tailwind CSS

Nov 2025 – Present

Show Website

Developed a production-grade news platform exploring the intersection of AI and cybersecurity. Implemented full-stack architecture with Firebase (Firestore, Auth, Admin API) for real-time content delivery and user management. Designed a secure custom CMS with Markdown support for editorial workflows and complex report publishing.

Local AI Assistant – Chrome Extension

JavaScript, TypeScript, Ollama, AI

Feb 2025 – Apr 2025

Built a privacy-focused extension running local AI models (DeepSeek, Mistral, LLaMA) via **Ollama** to eliminate external API dependence. Implemented modular background/content scripts and a popup UI for seamless interactions.

EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science (Information Security)

Thesis: A Comparative Analysis of BERT and LLM Models for Advanced Phishing Detection

Vellore, India

CGPA: 8.49 / 10.0

Abu Dhabi Indian School

CBSE – Class 12: 86.8%, Class 10: 89.8%

Abu Dhabi, UAE

ACHIEVEMENTS

Accepted to present my undergraduate thesis "A Comparative Analysis of BERT and LLM Models for Advanced Phishing Detection" as an Oral Presentation at IEEE CNC 2025; **Patent filed** based on the same work.

CERTIFICATIONS

Oracle Cloud Infrastructure 2024 Generative AI Certified Professional

Cyber Security – Python and Web Applications

Google Cybersecurity Professional
